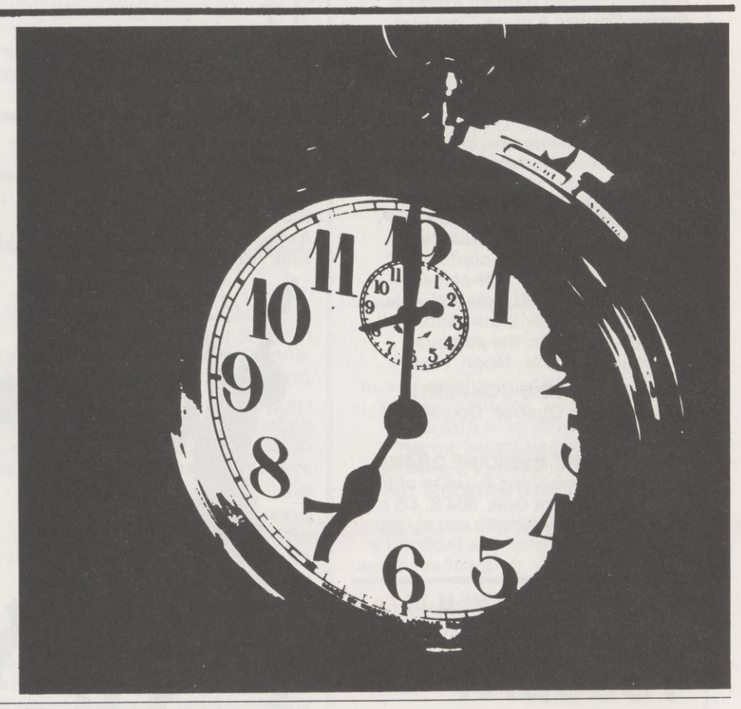
RUSH — TIME DATED

TODAY & TOMORROW



A new Night Security Shuttle Service to increase safe travel for UCSF faculty, staff, and students has started on campus. The new service, managed by the Campus Police Department, operates from 7 p.m. to 2 a.m., seven nights a week.

A clearly marked University vehicle, staffed by a uniformed driver, leaves every 20 minutes from the front doors of Moffitt lobby. Those using the service will be delivered to UCSF garage, public transit stops, homes, and parked cars within the area bordered by Clarendon, Stanyan, Lincoln, and Ninth Avenue.

During the first six weeks of operation, there will be an evaluation period to help assure maximum effectiveness. For further information, or if you have any suggestions or comments, contact Lt. John Anderson, x1414.

A series of six educational seminars on Proposition 9 (Jarvis II), explaining what's in it and what it could mean to the university, the community, and to you as an individual, will be held in Cole Hall, Wednesday, April 30 and Friday, May 2, three sessions each day: 7:30 to 8:30 a.m., noon to 1 p.m., and 4 to 5 p.m.

All six sessions will present the same program: A representative from "Citizens for California" will describe Proposition 9; followed by representatives from the Academic Senate, a student from California Council for Student Educational Needs, and campus administration, speaking on the probable effects of Proposition 9.

There will be an opportunity to ask questions.

All students, staff and faculty are invited to attend; there is no admission.

In addition, UCSF Continuing Education in Health Sciences is sponsoring an off-campus, one-day educational symposium for the public on "Proposition 9 and the Health of Californians," Saturday, April 26, at the Fort Mason Conference Center, Building A. Speakers will include Assemblyman Willie Brown, Jr.; Les Kelting, state-wide coordinator for the passage of Proposition 9; Rollin Post, political reporter for KRON-TV, Channel 4; Beverlee Myers, director, State Department of Health Services; Maureen Fitzgerald, writer for the *California Journal*; and A. Alan Post, former California legislative analyst.

Fee will be $15, including box lunch. For further information call x3904.

The growth of community water fluoridation lagged seriously during the 1970's, in spite of increasing evidence that it reduces tooth decay as much as 60%, according to Ernest Newbrun, professor of Oral Biology, School of Dentistry.

Participating in a symposium in late March at the meeting of the American Association for Dental Research, Newbrun noted that in the 1950's, the number of persons in the U.S. reached by community water fluoridation increased by more than 38 million and in the 1960's by another 40 million. However, during the 1970's only 17 million Americans were added to the number drinking fluoridated water, fewer than half as many as during the previous two decades.

Reasons for the failure of recent community fluoridation efforts include claims (which have been scientifically discredited) that fluoridation can cause cancer and Down's syndrome.

Newbrun called for renewed efforts to convince large numbers of undecided and uninformed voters of fluoridation's merits and benefits.

NEWS BRIEFS

"Dealing with Stress—Challenge of the '80s" is the educational program at this year's School of Nursing Alumni Day on Saturday, April 26. The program will be held in Cole Hall, with registration beginning at 8 a.m.

Speakers from the School of Nursing Stress Management Project will be June Bailey, Ann Baldwin, Sue Steffen, and Patty Zindler-Wernet, along with Duane Walker, director of nurses at Stanford. Their topics include "The Nature of Stress," "Dealing with Burn-out," and "Strategies for Dealing with Stress."

A luncheon and social hour will follow from 11:30 a.m. to 1 p.m. in the Millberry Union Cafeteria. Dean Margretta Styles will host a wine and cheese social later on in the day. For reservation information call x1471.

A Housing and Transportation Survey is now being taken on campus. All faculty and staff employees will be receiving a survey data card through the campus mail.

Coordinated by Robert LaPointe, special assistant to the Administrative Vice-Chancellor, the survey is intended to provide current data about the campus during the 1980 U.S. census year. It is hoped that an accurate picture of the housing market, vehicle ownership and use, community distances and related housing, transportation and demographic characteristics can be established . Comparisons will be made with these patterns over the years and between campuses, with 1980 used as the data base.

All University Alumni Day will be held on Saturday, May 10, from 8:30 a.m. to 4:30 p.m. at UC-Berkeley.

UC Alumni and friends are invited to participate in the program, which features distinguished faculty members from all nine UC campuses.

Registration for the conference is $7.50 and includes lunch and a hosted reception. Reservations should be received before May 1. For further information call the UCSF Alumni Office at x1471 or Alumni Activities in Berkeley, 642-1945 or 4976.

Twenty photographs by Paul Ekman will be on display at the de Young Museum in Golden Gate Park, April 19 through July 31. Ekman is professor and director of the Human Interaction Laboratory, Department of Psychiatry.

The photographs are of members of an isolated New Guinea tribe emerging from a stone age existence, who helped Ekman settle a century-long scientific debate that intrigued Darwin—"Are the facial expressions of emotion (smiles, frowns, wide eyes, and other facial actions which express our emotions) inherent and biologically universal to all people, or are they learned social behavior that would differ from culture to culture?"

Ekman in his book, *The Face of Man* (Garland STPM Press, N.Y.), concludes that the expression of emotion is based on universal biological rules. When someone feels a particular emotion and does not disguise it, his or her face expresses it in the same configuration as everyone else in the world. However, Ekman points out that culture strongly influences the expression of emotion. What makes one person angry may make another afraid and yet another amused.

A Continuing Education Course in Nursing, "Therapeutic Recreation: Special Play for Children Who are Sick," will be held at Children's Hospital, 3700 California St., S.F., on Saturdays, April 26 and May 3.

The course is designed for those who work and play with children in acute or community settings, such as community health nurses, pediatric nurse practitioners, school nurses, and pediatric recreation therapists. Topics covered will include a definition and philosophy of play, kinds of play, exploration of the playful spirit, what play reveals, and special forms of play for children who are sick.

A Middle Management Assessment Program (M-MAP) has begun on campus to help managers or employees assess their skills for managerial positions.

The program is designed for minority and women participants and is administered on this campus by the Training and Development and Affirmative Action offices.

Similar programs are already in effect at UC-Berkeley, Davis, Santa Cruz and Systemwide Administration. The program is funded by Systemwide affirmative action development funds and is administered jointly by the five campuses.

The program differs from past proggrams of its type, because it makes the assessment and decision to move into middle management solely the responsibility of the employee.

Nominations are now being sought for the John B. Harris Award. The award, presented annually to a UCSF graduating student from any of the four professional schools or the Graduate Division, goes to the student who best exemplifies Dr. Harris's qualities.

A Department of Medicine faculty member until his death in 1973, Harris was a dedicated scholar who contributed significantly to the teaching programs of the department as well as his own field of research. He was active in the Civil Rights movement and particularly interested in the educational opportunities to disadvantaged students.

Nomination applications are available through the Department of Medicine, 990 M. For further information contact Chequita Williams, x1371.

A number of Materiel Management activities have moved to Oyster Point in South San Francisco, to allow LS 101 to be used by other campus departments. Equipment Management, Storage & Surplus Operation (in Richmond), the main Purchasing Department (also in Richmond), and part of Receiving, are now at the South S.F. address. The on-campus Purchasing Office will remain at 1467-4th Ave., x2576. The new phone numbers are as follows: Equipment Management, 873-1916; Storage & Surplus Operation, 873-1918; Purchasing, x5761.

To allow Materiel Management Receiving to operate effectively, all equipment will be received at the Oyster Point location. All inquiries on delivery of equipment still can be made to campus receiving at x1271.

State legislation was introduced during March to establish a regional network of Poison Control Centers providing emergency telephone assistance to the public and health professionals.

State Senate Bill 1701, authored by Senator Diane E. Watson, and State Assembly Bill 2781, authored by Assemblyman Hershel Rosenthal, are designed to assure a coordinated statewide poison information and referral program and to provide support for existing Regional Poison Control Centers, such as the one sponsored by UCSF at SFGH.

Several hundred medical educators from across the country have been invited to UCSF to attend a May 4 national conference, which focuses on teaching future physicians the human side of medical practice.

The conference, supported by the Henry J. Kaiser Family Foundation of Palo Alto and sponsored by the UCSF Department of Psychiatry, will highlight UCSF's program on the psychiatric aspects of medical practice, which teaches medical students to help patients with their psychological reactions to illness and hospitalization.

Speakers for the conference include George Engel, professor of Medicine and Psychiatry at the University of Rochester School of Medicine; Robert Glaser, president of the Henry J. Kaiser Family Foundation, and professor of Medicine and former dean of the School of Medicine at Stanford; and Norman Cousins, author of the bestseller, *The Anatomy of an Illness* and former editor of the *Saturday Review*.

For further information contact David Rosen, assistant professor of Psychiatry and conference chairperson, at 665-8282.
